

Program to convert fahrenheit to celsius

```
#include <stdio.h>
```

```
main()
```

```
{
```

```
    float fahrenheit, celsius;
```

```
    printf ("Enter Fahrenheit value: \n");
```

```
    scanf ("%f", &fahrenheit);
```

```
    celsius = ((fahrenheit - 32) * 5) / 9;
```

```
    printf ("The Celsius value = %f", celsius);
```

```
}
```

Output

Enter Fahrenheit value 64

The Celsius value is = 17.77778
